

Rallye accessory

1. ICO tripmaster

All works riders use this rugged, small, light and reliable instrument. These functions are available: km counter, adjustable forward and backward during the ride, speed, clock, stopwatch, topospeed. Frontwheel size adjustable with 1cm accuracy. You can handle the tripmaster by the remote control without taking the hand away from the handlebar. art.: 919

Without pict. **Tacho illumination** makes the tachometer readable at night. art.: 918.11

2. Motorcyclecomputer IMO-100R

by Touratech. It replaces all instruments. You can choose between two indications. The instrument shows: speed, revs., clock and total mileage. Switched to rallye computer it shows: Total distance (adjustable by remote control), resettable distances and time. Total and partial distance can be shown either big or small. art.: 919.2

Motorcyclecomputer IMO-100R300 shows the following measurements in addition to the IMO 100R: date, short distance with average speed, daily mileage, long distance, finish distance, tankstop distance with average mileage calculation, acceleration measuring, top speed, stopwatch, outside thermometer, engine temperature and battery voltage. art.: 919.2

Motorcyclecomputer IMO-100R Sport shows the following measurements: speed, revs., shift indication, clock, date, total mileage, 2 shorttracks with average speed, counter, finish distance, acceleration measuring, topospeed, stopwatch, outside thermometer, engine temperature and battery voltage. art.: 919.03

All Touratech motorcyclecomputer have TÜV homologation and the following measurements: Length 120mm, width 80mm, height 34mm.

Remote actuation FB Standard fits all IMO instruments. art.: 919.211

Without pict. **remote actuation FB Pro** fits all IMO instruments. art.: 919.211

Without pict. **remote actuation FB Rallye** art.: 919.212

4. Signal lights by LED's with the necessary items for BMW R100GS measurements: Length 50mm, width 30mm, height 26mm. art.: 919.22

ditto **with the lights in a line** measurements: Length 80mm, width 18mm. art.: 919.221

Adapter to mount different combinations of roadbook, motorcyclecomputer and signal lights are available on request, please ask.

3. Electric roadbook, all racing riders trust this roadbook. Operated from the grip with back and forward motion. art.: 918

Without pict. **Roadbook illumination**. It shade-free illuminates the roadbook script from the backside, complete with mounting material. art.: 918.01

5. GPS: Due to rapid changes in the GPS models we give you the actual info on request.
